

Energy Report

Appliance standards generate huge cash savings for businesses and consumers

A recent study by the American Council for an Energy-Efficient Economy (ACEEE) reveals that current appliance, equipment, and lighting standards will save businesses and consumers more than \$1.1 trillion by 2035. The report goes on to say that by 2035, cumulative energy savings will total an amount equal to two years of total U.S. energy consumption.

Appliance, equipment and lighting standards, first enacted by Congress in the 1960s, are directly responsible for a significant reduction in overall energy usage in the United States. This lower energy usage has resulted in reduced emissions of greenhouse gases, lower peak demand levels, decreased pressure to build additional power plants and downward pressure on energy prices.

The ACEE study, *The Efficiency Boom: Cashing In on the Savings from Appliance Standards*, details the study's findings.

About Noveda

Noveda's expertise in energy and water management solutions will transform your organization's energy consumption and footprint. As a Noveda Technologies customer, you can expect to:

- Build a better bottom line
- Build a better market reputation, and
- Be better prepared for a future where energy and water consumption are key performance indicators for industry leaders.

A future that is here and now.

ROI Video

Track ROI of energy-saving equipment purchases

You want and need a new piece of equipment, but can't prove the ROI or justify the cost without it. Noveda's energy monitoring system tracks the energy usage of each piece of equipment used by a company to help you track and prove ROI.

Learn how energy monitoring facilitates calculation and proof of ROI of energy-efficient equipment purchases.
